

R E M A R K S

Claims 1 to 13 and 17 to 20 as set forth in Appendix II of this paper are now pending in this case. Claim 10 has been amended as indicated.

Applicants' amendment corrects obvious errors in the structures of formulae (1) and (2). More particularly, formula (1) has been revised to show a hydrogen bonded to the ring nitrogen to correct the insufficiency in bonds formed by the ring nitrogen, and formula (2) has been revised to remove the double bond between the carbonyl carbon atom and the ring nitrogen which rendered the carbonyl carbon penta-valent, and to show a hydrogen bonded to the ring nitrogen to correct the resulting insufficiency in bonds formed by the ring nitrogen. Page 18 of the application has been corrected accordingly.

The respective errors as well as the correction which obviates the errors are immediately apparent in light of formula (I-i) which is, for example, depicted in Claim 9 and which is generic to formulae (1) and (2). The correction therefore does not introduce new matter within the meaning of Section 132. Favorable action is respectfully solicited.

Please charge any shortage in fees due in connection with the filing of this paper, including Extension of Time fees, to Deposit Account No. 11.0345. Please credit any excess fees to such deposit account.

Respectfully submitted,

KEIL & WEINKAUF
